

Visiting in Winter 2012-13

National Park Service
U.S. Department of the Interior
Yellowstone National Park

Venture through cold and snow for an incomparable winter experience amidst the natural wonders of Yellowstone.

Open for visitors to enjoy year round

Make plans to enjoy scenery, wildlife watching, skiing, and snowshoeing throughout winter across Yellowstone's Northern Range. During daylight hours, a park road is maintained from the North Entrance in Gardiner, MT to the Northeast Entrance and beyond to Cooke City, MT.

All other roads into the park interior are either closed for the season, or are accessible only through guided tours of snowcoaches and snowmobiles. To ensure entrance on the days you prefer, make advance reservations, and bring a current drivers license. For a complete list of authorized winter guides and services, ask at visitor centers, or check the park website for a copy of *Commercial Operators Winter 2012-13 (Yell 291)* at www.nps.gov/yell/planyourvisit/winteract.htm

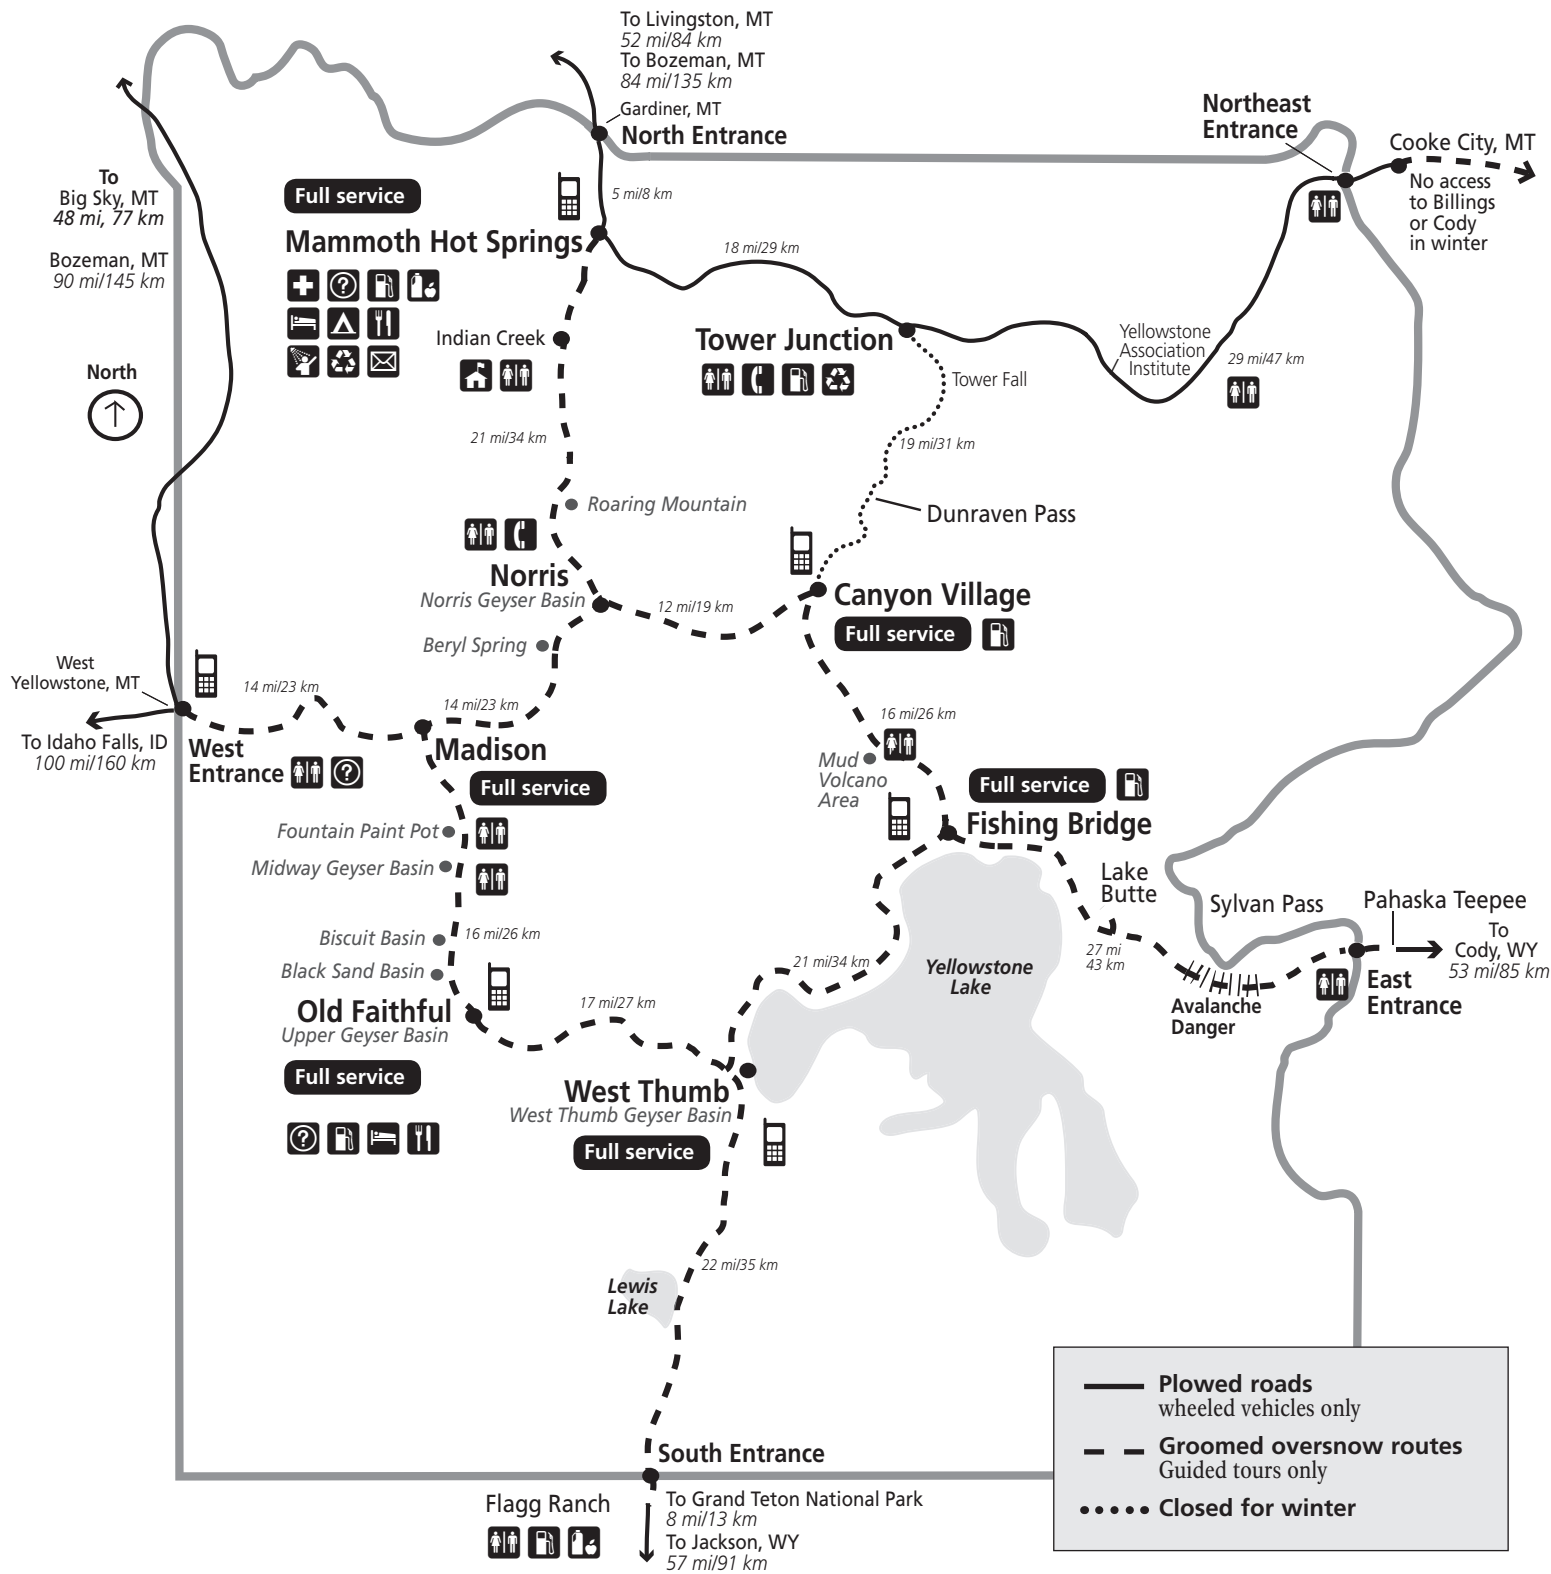

To arrange lodging at Mammoth Hot Springs or Old Faithful, contact Xanterra Parks & Resorts at 307-344-7311 or 866-Geyserland (866-439-7375), www.nationalparklodges.com

Planning continues

Yellowstone National Park and the National Park Service are preparing a long-term plan to manage winter use in America's first national park. During the winter of 2012-13, the park will operate under an extension that allows the same use levels and restrictions that have been in place for several previous seasons. Stay informed at www.nps.gov/yell/planyourvisit/currentmgmt.htm
